

Eurocopter A-Star B2, January 2011 Terrace Base

*Lloyd Hull
Accountable Executive*

With the arrival of spring Quantum Helicopters Ltd welcome back family members not seen in awhile and say hello to new crew members aboard for 2011.

With snow melting rapidly the company is abuzz with activity, our Ops guys are busy preparing and testing field gear, trailers, tankers and making necessary repairs to be ready for a new season of exploration. Our Maintenance department is working non stop preparing aircraft to go back into the field in mint condition after a strong winter campaign in the field while our pilots hone their skills finishing recertification and annual training required to be at their best in all situations. With Marketing working steady securing work and exposing the company to new markets its exciting to know we will be launching our new website in April on time for Minerals North 2011 with a new look and renewed online advertising.

Quantum Helicopters Quarterly Report April

2011

On display at H.A.C 2011 conference and trade show at the Vancouver Convention Center march 25-27th in Vancouver BC, Eurocopter's new A-star B3e. The new machine promises to deliver increased lift capability, speed, and hot/high performance in any terrain.

H.A.C 15th Annual Convention and Trade Show March 25-27th, 2011
Quantum Helicopters representatives in attendance
Jennifer and Kim Shearer, Stores and Accounting personnel

This years Helicopter Association of Canada tradeshow provided support staff a great opportunity to meet with vendors and suppliers of Helicopter components and services. From the moment you walked in the door you could feel a positive energetic crowd living up to the organizations motto, "bringing the industry together".

For the weekend event, you really felt how small and intimate the helicopter business is on the west coast and get the opportunity to put faces to names of those we have spoken to while ordering parts or procuring services over the years.

Fresh ideas, new helicopter products, support systems, and efficient models of operation are what Quantum Helicopters strives to implement in the field year after year to increase productivity and support to our clients needs. H.A.C gives operators the chance to see new technology and design under one roof in a three-day period. We are happy to have been able to participate in the event
